CARTE POSTALE. POSTKARTE.

By Appointment.

Washing Vegetables. The Nile is not only the chief waterway of Egypt, but is an important feature in the life of the natives. In its waters they wash their food, their clothes and their bodies, and from it they once obtained their main supply of drinking water. Its periodical floods also supplied the only means of irrigation for the agricultural districts, and it is no wonder that the Egyptians, both in the past and in the present, regard the river with great veneration.
